Dear Sirs,

I'm very pleased to recommend Medric for the position of software developer. As a project manager at Devoteam G Cloud, I've worked alongside Medric for the past 3 years. He has been a key player on our team for the technical parts. Medric's skills and teammate qualities would make him an invaluable addition to your information technology content development team.

Medric is working hard, he is focused on what he is in charge. He always wants to learn more and find solutions. He can listen, he is open minded and he likes to get advices.

He began as a simple developer on the software project and quickly he became the technical reference of the project. He didn't stop of improving technical, management and social knowledge. To me mind he still can progress. I don't know where are his limits.

The project was a planning software developed on Google cloud platform with the following technologies : Javascript (angular JS, Node JS), Mysql, BigQuery.

Almost all technologies were new and he learned them alone by using the Internet, it was a part of the job expected. The project is successful and the application is used everyday by all our company.

Medric has my highest recommendation for the position of software development and I am sure he his an asset for development project. Please feel free to contact me for any further information. Thanks very much for your time.

Sincerely,

Brice MICHETTI
